**Context / Research Domain**

On the right side of the document, there is a large, light blue sticky note with the text: "Collaborative working on GitHub, Slack and Google Doc to support synchronised working."

**Problem:** There's a lot of great advice out there on how to organise inclusive events, but a lot is on ephemeral channels like Twitter. People who are new to this area often don't know where to start, or what things they should think about. Official training is expensive and some institutional training is patronising or preachy.

**Solution:** An interactive fiction game to highlight issues people may not have considered in a way that's fun, accessible and well-researched. The tone is humorous and encouraging (not preachy!) -- and even the font was chosen for its accessibility. The resource is for people working in all disciplines.

# Twitter: @\_eventure

We collected crowdsourced resources using Twitter and started to get engagement with our own Twitter account (until Emily got it locked). We have clearly defined contributor information in our GitHub documentation, as well as a code of conduct.

Contributors can add episodes based on their own experience, making this a living resource.
